

M Navaneeth Krishna

Senior Flutter Developer | IIT Madras (BS Data Science)

navaneethkrishnaindeed@gmail.com

PROFESSIONAL SUMMARY

Senior Flutter Developer with 4+ years crafting production mobile applications across fintech, IoT, and enterprise domains. Creator of **PipeX** (state management 3.48x faster than Riverpod) and **fbloc_event_gen** (70-85% BLoC boilerplate reduction) — both actively used in production apps. Strong expertise in clean architecture, BLE integrations, CI/CD pipelines, and performance optimization. Passionate about building developer tools that ship faster code.

SKILLS

Mobile: Flutter, Dart, BLoC, Riverpod, Provider, GetX, Custom State Management

Architecture: Clean Architecture, MVVM, Repository Pattern, Dependency Injection, Modular Design

Integrations: REST APIs, Firebase, BLE (Bluetooth Low Energy), Push Notifications, Local Storage

DevOps: CI/CD (GitHub Actions, Codemagic, Fastlane), Code Generation, Automated Testing

OPEN SOURCE LIBRARIES

PipeX — High-Performance State Management

pub.dev/packages/pipe_x | Benchmark: github.com/navaneethkrishnaindeed/rainbench

- Built pipe-based reactive state management achieving **3.48x faster than Riverpod**, **7.05x faster than flutter_bloc**
- Custom dependency injection with scoped modules, lazy initialization, and lifecycle-aware disposal
- Deployed in 3+ production applications handling complex state flows

fbloc_event_gen — BLoC Code Generator

pub.dev/packages/fbloc_event_gen

- Compile-time code generation eliminating **70-85% of BLoC boilerplate**
- Auto-generates events, states, copyWith, handlers from single annotated class
- Reduced feature implementation from 80-120 lines to 10-20 lines — used across team projects
- Integrated into CI/CD pipelines with build_runner for consistent code generation

EXPERIENCE

Senior Software Engineer L1

Jan 2025 - Present

GeekyWolf | Trivandrum, Kerala, India

ControlCore — Fintech Accounting App

- Core contributor to Flutter mobile app for cloud accounting platform (invoicing, bills, reports, multi-tenant)
- Integrated PipeX and fbloc_event_gen into codebase, reducing feature development time by 40%
- Implemented offline-first data sync with local caching and background synchronization
- Set up CI/CD pipelines using GitHub Actions for automated builds and Play Store deployment

EverScent — IoT Smart Diffuser App

- Developed complete **Bluetooth Low Energy (BLE)** communication layer for hardware-controlled smart diffusers
- Implemented real-time device pairing, signal strength monitoring, and automatic reconnection handling
- Built scheduling system with fragrance intensity controls, timers, and preset configurations
- Collaborated with embedded firmware team to debug protocol issues and optimize packet transmission
- Added connection state logging and graceful fallback mechanisms for unstable BLE environments

Sr. Flutter Developer

Feb 2024 - Jan 2025

Ivory Technologies Pvt. Ltd. | Trivandrum, Kerala, India

- Architected scalable Flutter apps using clean architecture with feature-based modularization
- Implemented offline-first data sync with local caching and conflict resolution
- Set up Fastlane + Codemagic for automated iOS/Android builds and TestFlight distribution
- Established code review standards and architecture guidelines for the mobile team

Flutter Developer Gmagica Delhi, India	Feb 2023 - Jan 2024
• Built cross-platform mobile apps with complex UI animations and custom widgets • Integrated REST APIs with proper error handling, caching, and retry mechanisms • Collaborated with design team to implement pixel-perfect responsive layouts	
Mobile Apps Engineer (Flutter) Ykipp (Talrop) Malappuram — Clean architecture, code reviews, team mentoring	Aug 2022 - Mar 2023
Junior Project Coordinator Tegain Irinjalakuda — Project management and stakeholder coordination	Oct 2021 - Aug 2022

TECHNICAL HIGHLIGHTS

State Management: Custom solutions (PipeX), BLoC with code generation, Riverpod, Provider patterns
IoT/Hardware: BLE device communication, protocol debugging, connection resilience, real-time control
CI/CD: GitHub Actions, Codemagic, Fastlane — automated builds, tests, store deployments
Performance: Widget optimization, lazy loading, memory profiling, frame rate analysis

EDUCATION

BS in Data Science and Applications — Indian Institute of Technology Madras	2025 - 2029
