

M Navaneeth Krishna

Senior Software Engineer | IIT Madras (BS Data Science)

navaneethkrishnaindeed@gmail.com

PROFESSIONAL SUMMARY

Senior Software Engineer with 4+ years of experience in mobile and backend development. Expertise in Flutter, ASP.NET, and Data Analysis. Creator of high-performance open-source libraries including PipeX (3.48x faster than Riverpod) and fbloc_event_gen (70-85% boilerplate reduction). Proven track record in building scalable financial systems and innovative architectural solutions.

SKILLS

Flutter, Dart, ASP.NET, C#, Data Analysis, State Management, Backend Development, Domain Driven Design (DDD), Modular Monolith Architecture, Double Entry Accounting, REST APIs, SQL, Git

PROJECTS

Double Entry Bookkeeping System

- Lead backend development of multi-tenant double entry bookkeeping system with Business Tenants, Users, Vendors, and Customers
- Built core modules: Journal Entries, Chart of Accounts, Bills, Invoices, Projects with Split Allocations, and Email Tray
- Architected with Domain Driven Design (DDD) and Modular Monolith in ASP.NET with Firebase authentication

PipeX - Flutter State Management Library

pub.dev/packages/pipe_x | Benchmark: github.com/navaneethkrishnaindeed/rainbench

- Created high-performance state management library following pipe architecture for data flow
- Achieved 3.48x faster performance than Riverpod and 7.05x faster than flutter_bloc
- Implemented custom dependency injection modules and defined lifecycle management

fbloc_event_gen - Code Generation Library

pub.dev/packages/fbloc_event_gen

- Reduced Flutter BLoC boilerplate by 70-85% through auto-generation of state, events, copyWith, and handlers
- Reduced typical feature code from 80-120 lines to 10-20 lines per feature

MediateX

- Built custom mediator pattern implementation as alternative when MediatR became licensed

EXPERIENCE

Senior Software Engineer L1

Jan 2025 - Present

GeekyWolf | Trivandrum, Kerala, India

- Lead backend development of Double Entry Finance System using Domain Driven Design (DDD) and Modular Monolith architecture
- Built MediateX - custom mediator pattern implementation as alternative when MediatR became licensed
- Developing solutions using Flutter, ASP.NET, and related technologies

Sr. Flutter Developer

Feb 2024 - Jan 2025

Ivory Technologies Pvt. Ltd. | Trivandrum, Kerala, India

- Developed and maintained Flutter applications for enterprise clients
- Implemented scalable state management solutions and clean architecture patterns

Flutter Developer

Feb 2023 - Jan 2024

Gmagica | Delhi, India

- Built cross-platform mobile applications using Flutter and Dart
- Collaborated with design and backend teams to deliver user-centric features

Mobile Apps Engineer (Flutter)

Aug 2022 - Mar 2023

Ykip (Talop) | Malappuram — Developed Flutter apps with clean architecture and code review practices

Junior Project Coordinator

Oct 2021 - Aug 2022

Tegain | Irinjalakuda — Coordinated project timelines and stakeholder communication

EDUCATION

BS in Data Science and Applications — Indian Institute of Technology Madras

2025 - 2029
